### Mobile Edge Showcases *Checkpoint Friendly Laptop Case Collection*

*New ScanFast™ laptop cases TSA compliant*

ANAHEIM, Calif., - July 17, 2008 - Mobile Edge, the industry leader in innovative and stylish laptop computer carrying cases and accessories, unveiled three innovative “Checkpoint Friendly” laptop cases designed to help move traveling computer users through airport luggage checks more quickly. Now, airport screeners can X-Ray a traveler’s laptop while still inside their bag. The new cases from Mobile Edge have been tested and meet the new Transportation Security Administration (TSA) guidelines for carry-on luggage.

The TSA recently announced plans to implement new security procedures that will allow travelers to pass through security checkpoints without having to remove their laptops from their cases. Simultaneously, the TSA issued a request to laptop bag manufacturers to create “Checkpoint Friendly” laptop bags to help speed up security lines, allowing passengers to get to their departure gates in a timely manner. These new cases will help shorten wait times for more than 250 million passengers that travel annually in the U.S.

The design team at Mobile Edge quickly responded to the TSA request and came up with three new innovative case designs. This new ScanFast™ Collection consists of a backpack, a briefcase and a messenger bag, all designed to conveniently open for airport screeners and help speed travelers through the X-Ray screening process.

“This is an unprecedented request by the TSA to help relieve some of the congestion at checkpoint locations nation wide,” said G. David Cartwright, President & CEO, Mobile Edge. “We wanted to produce a range of laptop cases that were compliant with the new TSA guidelines and yet were still both stylish and functional, and we did just that.”

Incorporating industry proven Mobile Edge computer protection, all three cases will accommodate all popular models of laptops and will be covered by the Mobile Edge Lifetime Warranty. This new ScanFast™ Collection is scheduled to launch in late summer.

Mobile Edge continues to expand the laptop carrying case category by offering new, innovative and smart designs that fuse fashion trends with form and function, creating a brand that makes a positive statement about today’s mobile computing lifestyle.

#### **About Mobile Edge**

Mobile Edge is the industry leader in innovative and stylish laptop computer carrying cases and accessories for mobile business travelers. The company is committed to the highest quality standards in every case that it produces, from ladies carrying cases, messenger bags, briefcases, and backpacks to men’s V-Load™ vertical series and TechStyle™ series.
