## **How Lucky Is That? Mobile Edge Announces Re-Supply of Core Power Banks – Just in Time for St. Patrick’s Day**

### **With CORE Power, Consumers Don’t Have to Leave Mobile Power Up to Chance**

ANAHEIM, CA (March 10, 2022)—While stories about luck and merrymaking abound this time of year, Mobile Edge knows consumers need more than just luck to keep their vital mobile tech powered up. Depending on model, screen brightness, and usage, the average [smartphone battery charge](#) lasts an average of six hours and [laptop batteries](#) about four. That’s why, in the spirit of St. Patrick’s Day, Mobile Edge’s is pleased to announce the resupply of its CORE 27,000mAh Portable Laptop Charger.

“Relying on luck to keep mobile electronics powered up while on the road, in the air, out of the office, or in class is risky,” explains Paul June, VP of Marketing for [Mobile Edge](#). “Today’s electronics are power hungry. Their onboard batteries might keep mobile devices going part of the day, but they won’t keep them connected and productive all day long. To do that, consumers need a lightweight, reliable power source they can take with them.”

Mobile Edge’s [CORE Power AC USB 27,000mAh Portable Laptop Charger](#) provides the power and performance road warriors, mobile professionals, students, and gamers need. This mobile power bank delivers an extreme 85 watts of power that can charge a variety of devices, including smartphones, tablets, and even power-needy laptops. With its built-in universal AC outlet, no special adapters are required. Laptops plug in to it just as they would a regular wall outlet.

“The need for mobile power, on-demand wherever you are continues to grow,” says June. “With the CORE Power bank, missed deadlines, assignments, or shortened calls because your device’s battery dies at the worst possible time will become a thing of the past. That’s not luck. That’s good planning.”

The CORE power bank also features three types of USB ports that work with virtually any USB device, including Micro USB, Lightning, USB-C, and Qualcomm Quick Charge 3.0.

Lightweight, compact, and durable, the CORE power bank meets [carry-on requirements for lithium-ion batteries](#). It goes practically anywhere, including airplane carry-on luggage.
